

Anton Björkman

Profile

A curious software developer who is passionate about developing software. My greatest strength are that I am a good listener and take on challenges in a structured way.

Employment History

Labbassistent at Malmö University, Malmö

March 2019 – June 2019

In the course Multi-threaded programming.

IT-Helpdeks at Malmö University, Malmö

May 2018 – Present

Helps students with their IT problems, such as connecting to the Internet, Word documents, change password and more.

Mentor at Malmö University, Malmö

January 2017 – February 2018

Machine operator at Inpac Pharma, Lund

June 2017 – August 2018

Cashier at Coop, Malmö

2011 – 2013

Projects

Internet of Things

Malmö University

The project is about collecting data from different devices, and then visualizing this on a website. AWS and Javascript were used to create this web-app.

Desktop Lounge

Malmö University

This web application is allowing the user to enjoy a calm and nice atmosphere. You can select different background images, which are changed at regular intervals. CSS mix-blend mode and jQuery was made to make this effect.

React Music Klient Database

Simple web application, where the user can add their favorite songs. My first project with React.

Education

Bachelor of Science in Computer Science, 180 credits, Malmö University, Malmö

August 2014 – May 2019
